

Step 2: Pandas

In this step Sales Data Analysis with Pandas I used in Google Colab to write the code of Pandas.

Here the steps to analysis the data.

1. Open Google Colab then my file Cleaned_data.xlsx upload there.
2. Then write the code
3. First of all import pandas as pd and matplotlib.pyplot as plt.
4. Then read the file is Cleaned_data.excel.
5. Calculate total sales .
6. Then Group the data according to country and add the Sales for each country using groupby.
7. Sort from largest to smallest which is sort_values(ascending=False).
8. Then sorted Top 10 countries by Sales according largest to smallest.
9. Create bar chart for the Top 10 Countries by Sales.
10. Create pie for the top 5 Countries.
11. Same all above the steps Create bar chart for the Top 10 Customers by Sales.
12. Create bar chart for the Top 10 Products by Sales.
